About Me

Software Engineer with a strong focus on backend development, API design, and database systems. Experienced in the MERN stack, Next.js, and AI-powered applications including RAG pipelines and agentic workflows. Passionate about building scalable, secure, and production-ready web systems.

Education

Charusat University — 2023 – 2027
Bachelor of Computer Engineering - CGPA: 8.85/10

FMCT School — 2023
GSEB Class XII

Technical Skills

- **Languages:** Java, JavaScript, TypeScript, SQL
- **Frontend:** React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, Shadcn UI, Zustand
- **Backend:** Node.js, Express.js, MongoDB, PostgreSQL, Prisma, REST APIs, JWT Authentication, WebSockets, Zod
- **Tools:** Git/GitHub, Clerk, Supabase, SQL
- **AI & Automation:** LangChain, LangGraph, OpenAI API, RAG Pipelines, Workflow Automation (n8n)

Projects

HelloAI – AI Powered Meeting System [Repo Link]
Tech Stack: Next.js, TypeScript, PostgreSQL, tRPC, Drizzle ORM, Stream Video, OpenAI, Inngest, Polar, Better Auth

- Built a real-time AI agent platform where users can create instruction-driven agents and conduct live voice meetings with AI-powered interaction.
- Implemented automated transcription, meeting summaries, recording storage, and integrated Polar for secure subscription and payment management.
- Designed a type-safe full-stack architecture using tRPC, PostgreSQL, and event-driven workflows with Inngest.

APIForge – Developer Platform for API Testing & Code Generation [Repo Link]
Tech Stack: Next.js, PostgreSQL, Prisma, BetterAuth, Tailwind CSS, AI APIs

- Built a developer-focused API testing platform supporting REST and WebSocket requests with real-time response inspection and debugging.
- Implemented an AI-powered backend code generation engine that converts request data into production-ready controllers, routes, and models.
- Designed a workspace-based system with API collections and team collaboration, including shared collections and member invitations.

InterviewMate – AI-Powered Technical Interview Preparation Platform [Repo Link]
Tech Stack: Next.js, MongoDB, Clerk Auth, OpenAI API, Tailwind CSS

- Developed an AI-driven interview preparation platform generating domain-specific questions and evaluating answers in real time.
- Implemented Practice and Mock Interview modes with role-based authentication (User/Admin) using Clerk.
- Built performance analytics and an admin dashboard with domain-wise insights, leaderboards, and user management.

Experience

TLK Industries PVT. LTD. — May 2025 – June 2025
MERN Stack Web Developer

- Developed RESTful APIs using Node.js and Express.js and integrated them with React-based frontend components.
- Designed and managed MongoDB schemas with proper validation, optimized queries, and secure data handling.
- Implemented authentication, authorization, and protected routes to ensure secure end-to-end application access.

Hackathons

Odoo-X-Gandhinagar | **Odoo-X-SPIT**

Soft Skills

Teamwork | **Time Management** | **Critical Thinking** | **Communication** | **Problem Solving**
